I foresee that at the beginning of the year 2025, Nigeria will experience lots of ups and downs. The year will start with confusion here and there even as people will be complaining. The spirit of God says Nigerians must in the first seven days of the new year to fast and pray and seek the face of the Lord because of five major things. The spirit of the Lord revealed to me that things will be difficult even as the economy will be sluggish. I foresee there will be deaths and political tension. There must be prayers for the people in power and positions of authority even traditional rulers and

community leader. We must offer prayers for peace request the Lord to cancel the agenda and evil plans of the enemies. Let us seek the face of the Lord so that God can prevent any strange sickness that is the type never experienced before.

The spirit of God says we must pray against sudden events that will shake the Judiciary the Legislature and the Executive Arms of government. Let us rebuke natural disasters and troubles. The spirit of God says we must pray against attacks and counter attacks. Let us rebuke threats to peace, sudden and premature deaths, un- anticipated bloodbaths, cries, anguish and pains.

The Lord revealed to me that we need fervent prayers for our children, religious institutions, the frontline Educationists, Legal luminaries, Market leaders, youths and our leaders in the political, economic, public and private sectors of the economy. We must pray also against economic distortions, disorderliness and upheavals. Let us rebuke accidents at sea and the maritime industry in general. We must rebuke fatal accidents on our roads and the aviation industry. Let us pray the Lord to grant our military and security agencies divine protection. These are the words of the Lord.

The spirit of the Lord says Nigeria needs to seek the face of God in 2025 because things will take a new format that will baffle the people. I foresee the government will be struggling but the manifestations will be very confusing. The people will be complaining that it appears everything is not going well as expected.

In Nigeria there will be persistent electricity problems. I foresee that the Electricity Distribution Companies will be changed and the power distribution companies will have quite a lot of issues to contend with.

I foresee that the Nigerian government will borrow money and this debt burden will still cause a lot of problems in the Senate Chambers of the National Assembly. I foresee that on the creation of new States and Local Governments as well as the new salary and minimum wage issues, the government will not be able to meet up on majority of these.

The spirit of God revealed to me that the creation of more states will add more to the burdens of the Federal government. I foresee that some states will not be at ease on the issue of Local Government Autonomy. I foresee this will still cause problems.

The spirit of God says there will be problems between the ruling party and the opposition parties. I foresee the Opposition groups will be making attempts to unseat the ruling party. I foresee gang ups by the Opposition groups as they will be putting heads together to fight the party in power. The spirit of God says this will be causing

lots of rancour in different geo-political zones of the country. The spirit of God says if they want to unseat the government they must form a strong coalition. I foresee that a strong coalition that enjoys divine direction and equally abide with spiritual instructions will send the ruling party packing. The spirit of God says new political parties will be coming up to fight and agitate for the liberation of the country from all these political logjams.

Government will be telling lies about the Gross Domestic Product {GDP} and will be propounding other vague economic theories that will not add any value to the lives of the citizens.

The government pronouncements on the state of the economy will be full of lies that will not see the light of the day even in the next century. Only those who agree with and are ready to sing in discordant tunes will benefit from this government.

We must commit our State Governors and their Deputies into the hands of God and rebuke crisis that may arise between or among them.

State government in Nigeria will desolve all state electoral commission of their state.

If the government can manage adequately, the revenue generated by the customs service is enough to sustain the country. Sincerely, this money can be used to clear up our debt log. There is need for the government to review the activities of the revenue generation. Loans will kill the country and the economy.

I foresee that Corn will be expensive and will be in high demand. Also, Diesel will be scarce in April 2025.

There is going to be a lot of political maneuvering in 2027. Political leaders from different geo-political zones will pledge their loyalties to the ruling party. Some will want Tinubu to continue while some will not.

The spirit of the Lord says that the only way to fight this poverty is for the Nigerian government to encourage local manufacturers and exportation. This will go in a long way to put an end to poverty and hardship.

Tinubu's government will develop five strategic formulas to fight the opposition. And if opposition are not desperate, they cannot unseat him. They must be very

desperate financially, economically, spiritually so says the Lord. Ordinary ideas cannot remove Tinubu

The house of representative will not be recognized by some Nigeria and only a few senators will be able to challenge the ruling party. The opposition will not be able to sustain the momentum. I see this government as the government of “we we” or “chop make I chop”

In 2025, if something is not done urgently to ease the hardship, people will see this government as government that creates unhappiness to the nation. Economy will not be and honestly, either Naira depreciates or not, it will not ease the pains of the people unless the government of the day works really hard to assuage the sufferings of the public. The opposition will see this as a medium to fight Tinubu's government. Things will not be so easy. The government needs twenty-four hours attention on the economy in order to avert poverty and wants. There must be twenty-four hours of uninterrupted power supply to boost economic activities and thus hardship will be a thing of the past.

I foresee that if the government failed to address these issues, the people will revolt as from 2025 because the poverty level will lead to internal discontent and rowdy sessions as revealed by the spirit of God.
